

Installing Your Career Operating System

Get Hired Faster Easier (GHFE) – Course Orientation & Setup

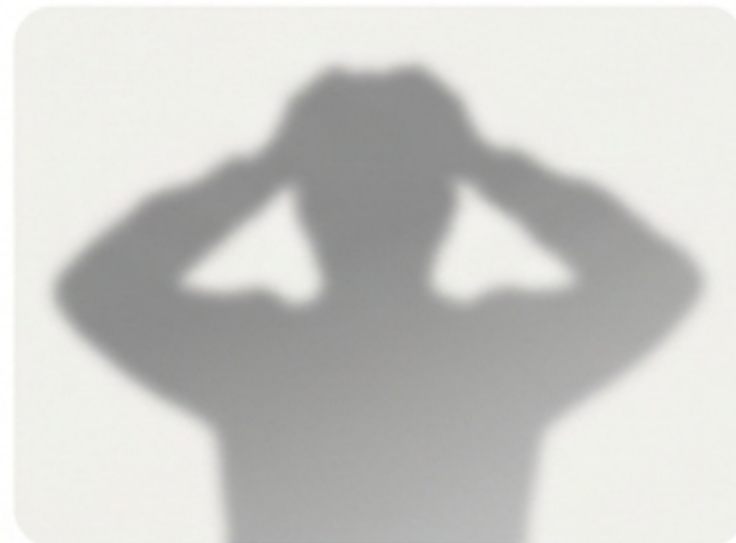

INITIALIZING SYSTEM v1.0

Engineered, Not Just Taught

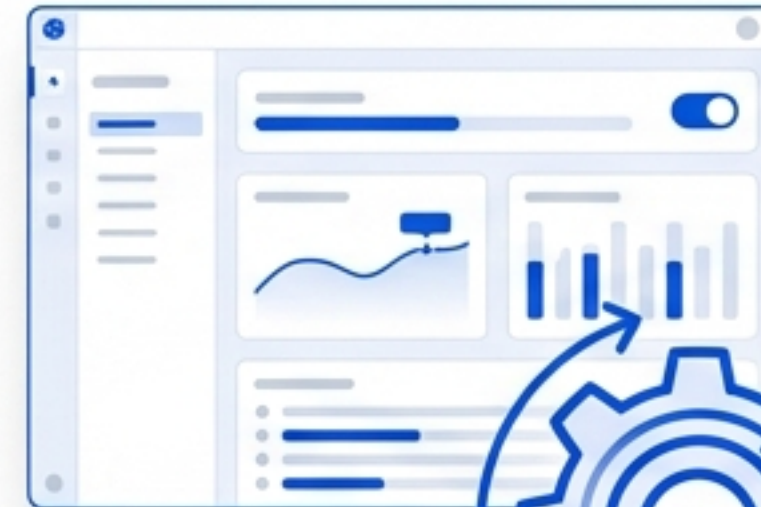

Over the next 11 modules and 47+ lessons, you are moving away from generic tips and passive watching. You are installing an active, lifelong career infrastructure.

The Old Way

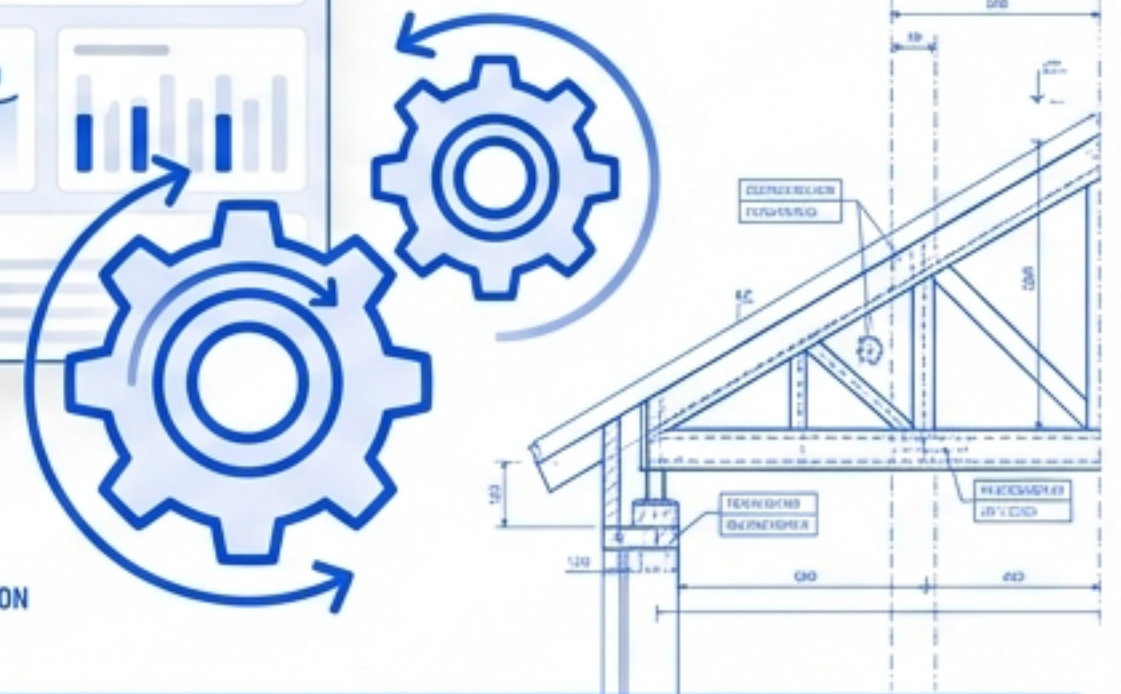

The GHFE Way

ACTIVE SYSTEM ☒

MODULE 01 // INSTALL
PHASE 03 // OPTIMIZE

MODULE 01 // INSTALL
PHASE 02 // RDOBESS
PHASE 03 // OPTIMIZE
DATA POINT: 100% INTEGRATION

A system that runs for the next 30 years
of your professional life. 

System Compatibility Check

GHFE is strictly calibrated for mid-career professionals (5-25+ years of experience).

Compatible Profiles

- ✓ Talented but stuck, invisible, or underpaid
- ✓ Applying with zero callbacks
- ✓ Career pivoters needing translation
- ✓ Recently laid off needing a strategic plan
- ✓ Quietly exploring new opportunities
- ✓ First-time negotiators
- ✓ AI-curious professionals

Incompatible Profiles

- ✗ Brand-new graduates seeking a first job
- ✗ Get rich quick seekers
- ✗ Passive watchers unwilling to do exercises

The GHFE Architecture

1. System over Series

5 lifecycle phases tied together via a central Career OS dashboard.

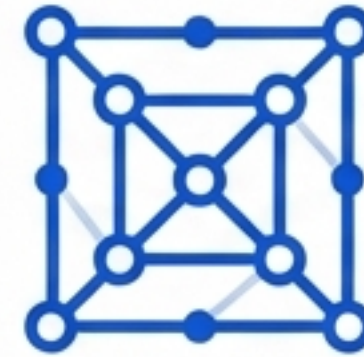

2. Artifact-Driven

Every lesson yields a tangible output. You build as you learn.

3. AI Heavy Lifting

19 specialized AI agents handle research, optimization, and simulation.

4. Named Frameworks

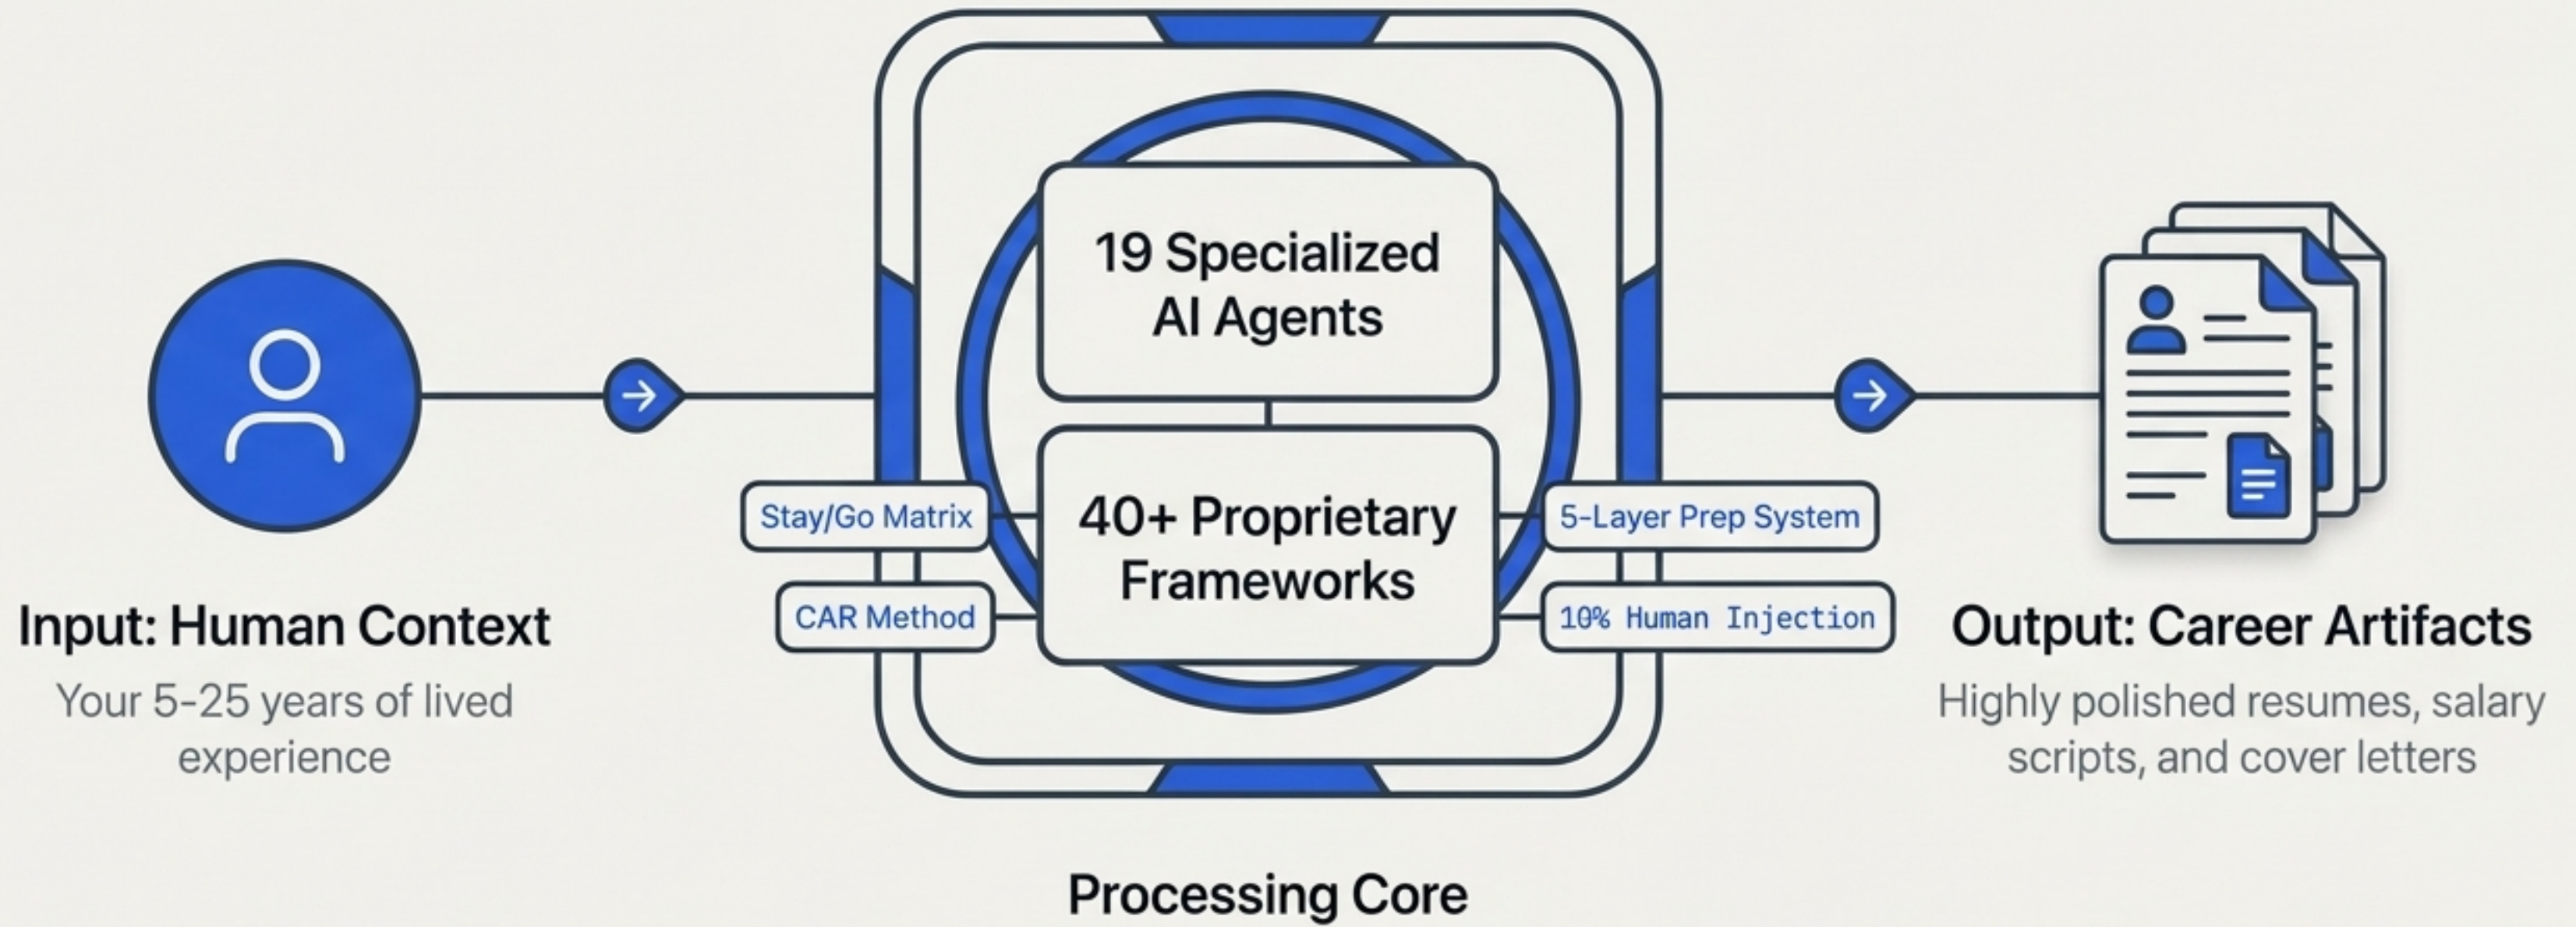

40+ proven methodologies including Stay/Go, CAR, and 5-Layer Prep.

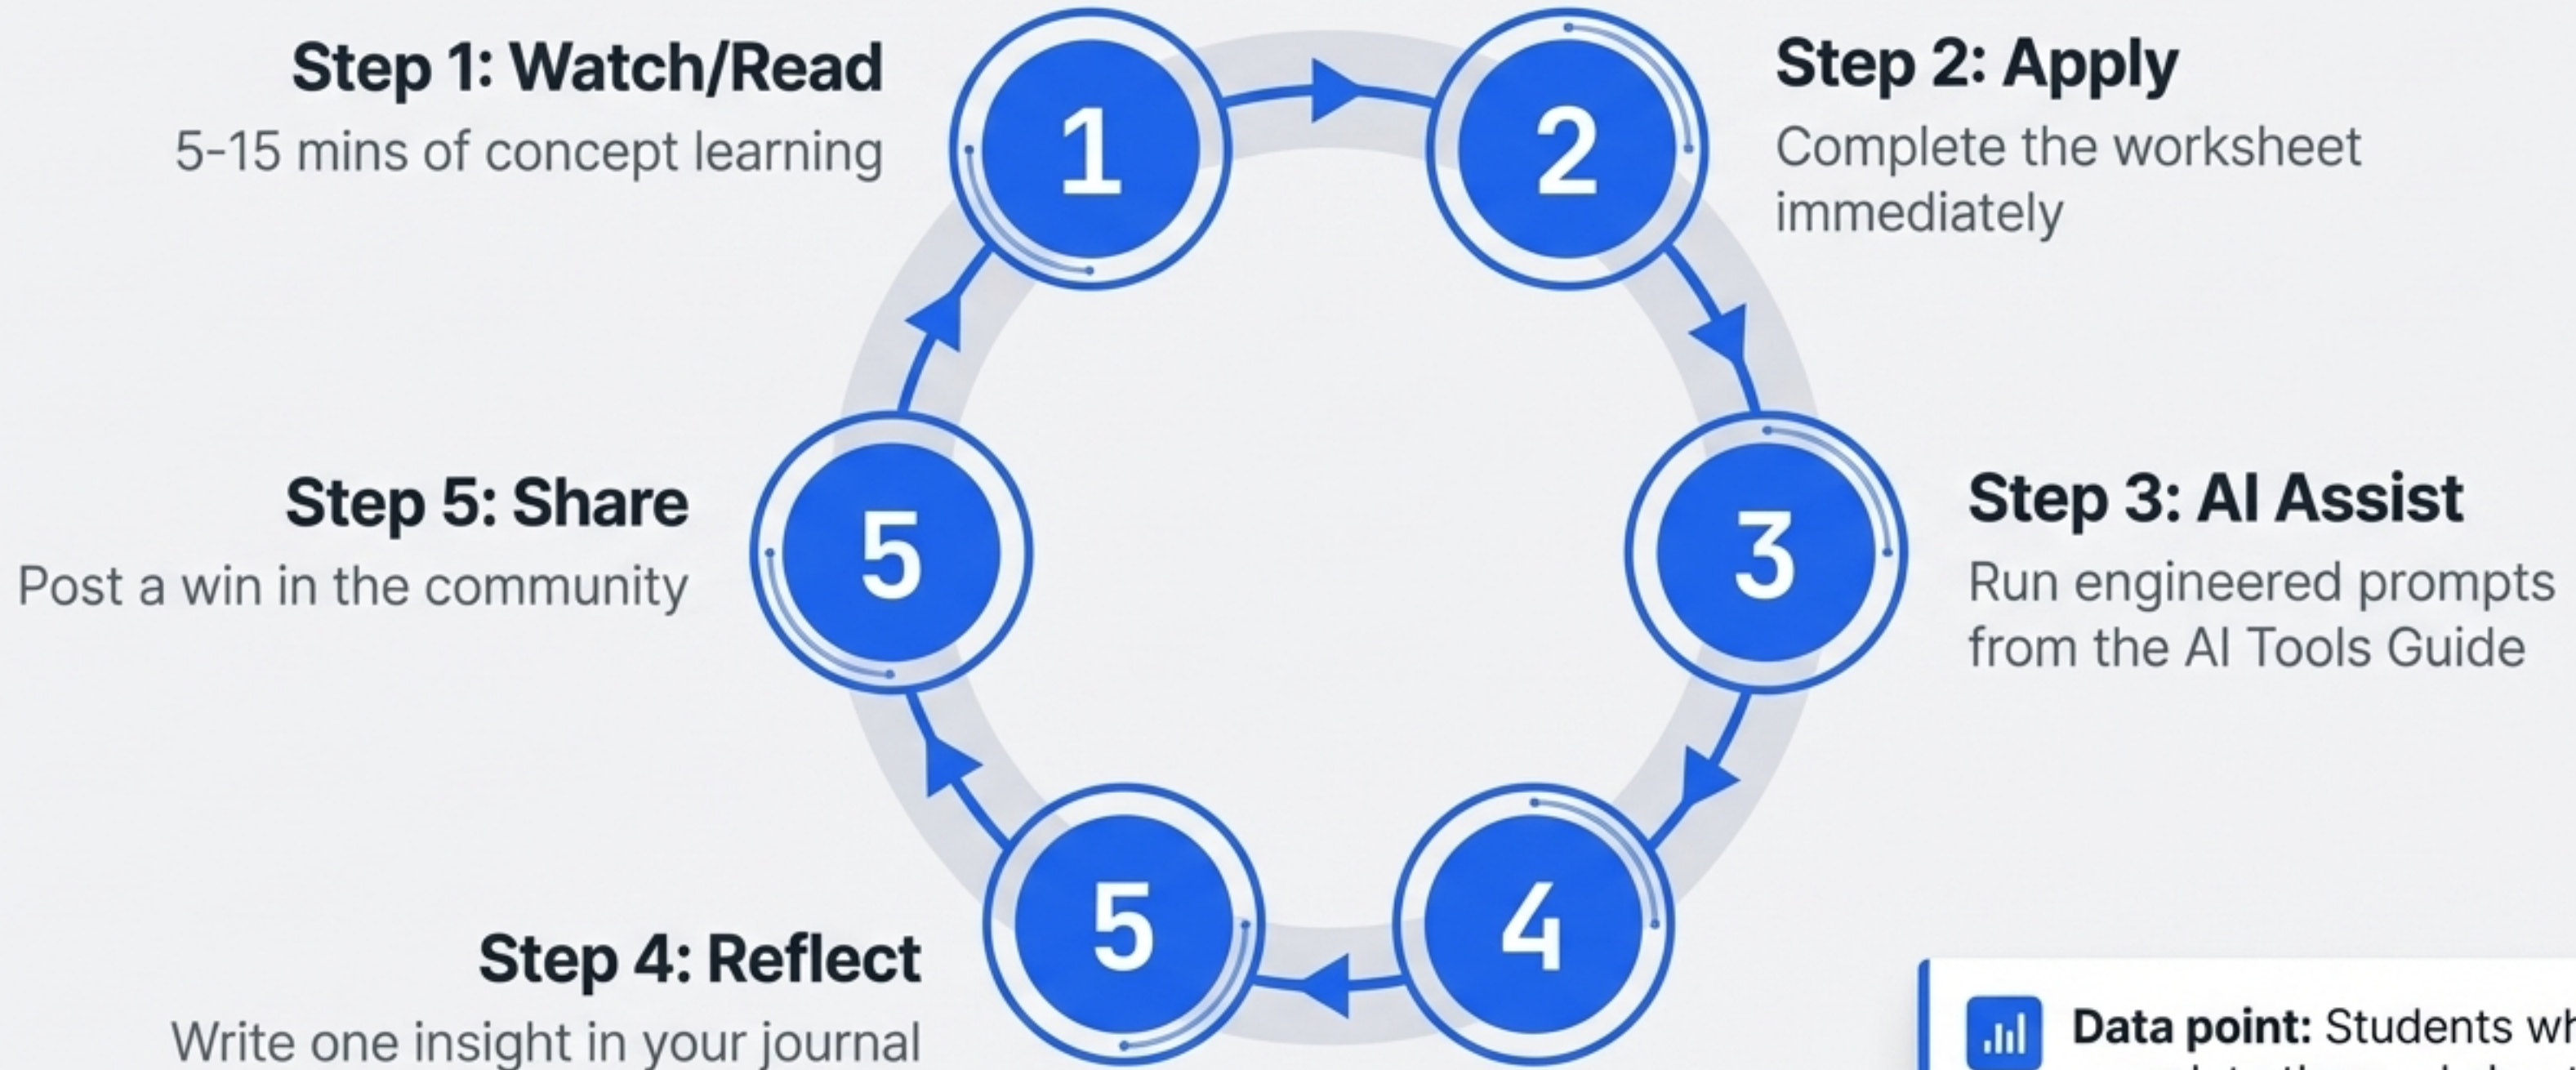

5. 2026 Market Ready

Engineered for ATS, AI screening, and skills-first hiring.

The Engine: 10% Human Injection, 90% AI Output

The Execution Rhythm

Data point: Students who complete the worksheets report 3x better outcomes.

Operational Requirements & Rules of Engagement

Tech Specs

-  **Time:** 3-5 hours/week for 6-8 weeks
-  **AI Access:** ChatGPT, Claude, or Gemini
-  **Account:** Google Account for OS Dashboard
-  **Assets:** Current Resume (even if outdated)
-  **Environment:** Deep Work Workspace

Rules of Engagement

- DO:** Execute in sequence. Modules build on each other. Do not skip Module 1.
- DO:** Use the engineered prompts. Do not use generic AI requests.
- DO:** Apply before advancing. Do not binge-watch the content.
